

SAFE-World Project/Initiative Summary

Country: Egypt

Project/Initiative Title: Biodynamic Cotton

Nos. farmers: 150

Hectares: 2000

Agro-Ecological Zone: XII

Improvement types

1x	2	3x	4	5	6x	7	8	9
----	---	----	---	---	----	---	---	---

A. Key Impacts

A1 – Productivity

	Before/Without	After/With	% change
Cotton	2100 kg/ha	2600 kg/ha	24

A5 – Key changes in farm / regional system

Yields up 25% on conventional cotton. Yields fall after conversion but then rise to 2600 kg/ha

Also producing organic vegetables

D. Contact Point for Project/Initiative

Mohamed SABER (Prof. Dr.)

Bio-organic Farming for Sustainable Agriculture
National Research Center,
Dokki,
Cairo,
Egypt
