Statement of Consent

This is a <u>cumulative</u> skills book which will build, over the course of your studies, into a comprehensive record of your skills achievement. Each subsequent placement mentor, supervisor and assessor will be able to view what has been recorded by previous mentors, supervisors and assessors. This is necessary for them to be able to see areas of strength and weakness in your performance and thus negotiate areas for development within your placement. This document is important and you must keep it safe at all times. It is a permanent record of your practical achievement during the programme which will contribute to the evidence required for final registration. It must be submitted for inspection at the end of every placement and as part of your portfolio.

By signing below you indicate that:

- 1. You understand and consent to your on-going record of skills achievement being shared with each of your mentors/education providers during your studies.
- 2. You understand and agree that it is your responsibility to keep this record safe and ensure that an accurate copy is maintained.

Signed	Date
Student Name (print)	

In the event of an irretrievably lost/destroyed book:

The student will work with the relevant programme lead and placement unit to attempt to capture available information from other sources.

The student and the programme lead will prepare a statement indicating what can be incontestably proved to have been completed.

Current/recent evidence that can be confirmed with mentors will be signed off with a note indicating circumstances.

The student will commence a new skills book from the point agreed with the programme lead.

Statements of Progression:

To be completed by the mentor/practice assessor at Progression Point 1.

I have reviewed the student's skills assessment record up to progression Point 1 (PP1); all skills have been satisfactorily achieved.
Therefore student (insert name) should remain on the programme in order to work towards Progression Point 2.
Assessor Name Date

Roles that support student supervision and assessment

Mentor (until September 2019)

A Registered Nurse who supervises and assesses the student. The mentor must have undertaken a programme of mentorship preparation, an annual mentorship update, triennial review (if more than 3 years since initial mentorship course) and needs to be annotated on their organization's live mentor register. This role will cease to exist in September 2019 and will be replaced with the separate roles of Practice Supervisor and Practice Assessor.

Practice Supervisor (from September 2019)

Any NMC registrant or other registered health/social care professional, who supports and supervises students' learning and participation in practice, identifies learning opportunities, provides feedback on progress, and serves as a role model for safe and effective practice. In most placements, students will be supervised by a number of Practice Supervisors. Practice Supervisors may undertake formative assessment.

Practice Assessor (from September 2019)

An NMC registrant who conducts objective, evidence-based assessments through the placement, provides constructive feedback, and confirms a student's achievement of proficiencies and outcomes. The Practice Assessor may not be the Practice Supervisor for the same student. The Practice Assessor summatively assesses the student against the documented assessment criteria using various sources of evidence including direct observations of the student in practice, and verbal and written feedback from practice supervisors, service users and students. Practice Assessors will have been prepared to undertake this role.

Academic Assessor

Academic assessors are usually members of university staff who collate and confirm student achievement of proficiencies. The academic assessor liaises, communicates and collaborates with the Practice Assessor to confirm the student's progress.

Link-Lecturer and Practice Educator

A member of the University staff, who has specific responsibility for liaison between the staff of the practice area, the University and the student. Link-lecturers and practice educators are available to support those working with students in the practice learning environment.

Introduction & General Information

The following package has been drawn from the NMC's Standards for Pre-Registration Nursing (2010) Annex 3 Essential Skills Clusters (ESCs) which itemises the skills required for entry to the Register. The package has been developed with reference to The Code: Professional standards of practice and behaviour for nurses and midwives, (NMC 2015, www.nmc-uk.org.uk), and the values outlined in the NHS Constitution (DoH 2013).

Each of the ESCs has been mapped against the skill areas to be assessed in this practice document. Each skill includes criteria by which the student can demonstrate achievement. A reference to this can be found under each skill heading, (e.g. ESC 7.1; "Applies the principles of data protection" applies to the assessment of skills for Record Keeping).

Progression Points (PP1 and PP2) and Completion Point (CP)

Twice during the programme (Progression Points 1 and 2) students will need to have demonstrated satisfactory development in order to continue within the programme. It is the role of the mentor or practice assessor to make a decision about the student's progression into the next part of the programme. At the end of the programme (Completion Point) the student must have demonstrated competence in all of the skills required for entry onto the register.

The book contains 20 *focussed skills assessment (see below)* sets that the student is required to have achieved by completion of the programme. Each of the skills sets is split into three points, (eg Record Keeping is assessed at 2a, 2b and 2c) which must be completed in sequence. All (a) skills must be achieved by PP1, all (b) skills achieved by PP2 and all (c) skills achieved before CP.

Although all of these skills are important, the need for brevity has also been acknowledged. In consequence, skills developed in PP1 are not generally

NURSING PROGRAMME - Development of Practical Skills - Nursing, 2018 repeated in full in the documentation of PP2 and CP. It is recognized, however, that they will remain current throughout the programme, building the students level of competence and confidence and, therefore, should be practised as much as possible in order to acquire mastery.

Learning contract: As of the usual placement part support, mentors/supervisors/assessors and students are expected to document (using the pages towards the end of this book) a meeting at the start, middle and at the end of each placement. In these meetings the student and mentor/supervisor/assessor would briefly discuss the learning aims/outcomes in relation to the placement. Together, they identify and record opportunities to achieve aims/outcomes, whilst identifying other learning opportunities that the student may not be aware of. At the mid placement reviews and completion reviews a record should be made of progress in relation to meeting the learning aims/outcomes.

There are two types of skills areas to be assessed during the student's placements. Firstly there are the **Core Professional Values**, which reflect both professional and NHS values. This assessment must be undertaken in <u>every</u> placement. At the end of each clinical placement the assessor makes an overall assessment of the student's performance and progress using the relevant pages at the end of this skills book.

Comments are invited on the student's performance. This might include constructive evaluations of the strengths and weaknesses of an individual student, progress towards core professional values or other issues that a assessor feels relevant to assist the student to become a Registered Nurse. Should a student fail against any of the core professional values, the student will have failed the clinical placement; the assessor must give specific comments to support this. Assessors must, at the earliest opportunity, bring to the attention of the student any apparent deficits in their practice or values that would put them at risk of failing the placement and negotiate with student an action plan to address these deficits. This should be done by utilization of p201.

A student who fails a placement will be given one opportunity to re-take the placement; this re-take opportunity will be a placement of a similar duration towards the end of the programme. If a student fails a clinical placement on the

NURSING PROGRAMME - Development of Practical Skills - Nursing, 2018 second attempt at the assessment, no further attempt is allowed and the student is required to withdraw from the programme. Only one failed clinical placement is permitted to be retaken as a second attempt. If a student, who has already had a failed placement, fails a resit placement or a second placement they will be required to withdraw from the programme.

The second type of skills is the **Focussed Skills Assessments**. These skill areas can be assessed in <u>any</u> of the placement settings a student works in during the programme. However the assessor student may find that one placement setting may be more suited to undertaking practice and assessment in a particular skill/performance criteria. Therefore each focussed skills assessment does not need to be undertaken in every placement setting. The assessor and student should identify early on in the placement which of the focussed skills assessments would be most suited to the placement area they are presently working in.

Throughout their placements, students and staff are invited to record the student's progress on the Progress Sheets. In **areas where the Enhanced Practice Support Framework (EPSF) is being used,** progress sheets should be used by students to document their reflective learning account related to their specific learning goal(s) for that shift relevant to the focussed skills assessments. The principles of the EPSF require the supervisor with whom the student is working to countersign the student's reflective learning account in the progress sheet (see guidance on pages 11-16).

Some of the criteria in the focussed skills assessments may be practised in a simulated environment prior to the placement experience and will be assessed by the lecturer. Most skills should also be practised in the clinical area, where they will be assessed by the mentor/assessor and/or the lecturer. The terms "Classroom" "Classroom/Placement" and "Placement" refer to the location of assessments.

When an assessment is undertaken the assessors are invited to provide comments on the student's performance in the **comments** box, and summarise the judgement by indicating the student's grade in the "Assessment" section. A student may repeat **formative** assessments as often as necessary within their placements. Once sufficient assessment of the student's ability in a skill area has

NURSING PROGRAMME - Development of Practical Skills - Nursing, 2018 occurred, (i.e. each of the performance criteria has been addressed), the assessor may assess and record the student's level of achievement in the **summative** box at the bottom of the page.

Should a student fail a summative assessment the link lecturer **must** be informed before that assessment is repeated. The student should be given support to achieve the standard required for safe practice by the assessor and tutor. Should a student fail to successfully complete any summative assessment during the placements, a further opportunity will be offered for the student to be re-assessed. The student must achieve a pass grade in all summative skills assessments by the end of the programme. If a student fails any summative skills assessment on a second attempt they will have failed the programme and will be required to withdraw.

The awarding of a specific grade by an assessor must only be based upon the student's performance during the completion of a specified assessment. Please refer to the **Guidelines for Scoring Skills Assessment** (see below) for a further explanation of the grades that should be awarded during practical assessments. Examples of pass and fail records are given below. The importance of a rigorous assessment must not be under-estimated. If there is an issue that arises with a student in clinical practice, (including strong concerns or a failure of the student by the assessor in a skills assessment), the guidance given on pages 10-12 must be followed. Student nurses should not be failed on a single aspect of performance, provided that they accept guidance and modify their future practice accordingly.

If the student nurse has <u>not</u> reached the standard for any item, the link lecturer must be informed at the earliest opportunity before that assessment is repeated. The link lecturer will assist both student and assessor to make fair assessment of the student's performance. The assessor will need to supply evidence on which the decision is based. This should include records of:-

- 1. The events on which the decision is based.
- 2. Discussion with others involved in training.
- 3. Discussions with the student nurse.
- 4. The evaluation of the student nurse's failure to progress.

NURSING PROGRAMME - Development of Practical Skills - Nursing, 2018

5. The reasons for the failure.

Summative assessment can also be undertaken by a member of the teaching staff on the Nursing Programme. Their judgement will be based upon;

The formative assessment records undertaken in practice

Evaluation of information contained in the progress sheets

Discussion with the student

Reference to any Record of Additional Learning Needs Sheets

Observation of simulated practice

Discussion with the student's clinical assessors

It is anticipated that all students will make the most of the opportunities offered to them on placement. Should there be concerns about a student, please follow the guidelines given under the section 'what to do if' (further guidance and contact details can be found in in the end section of this book). The University staff will work with you to address these concerns.

The structure of the package should not be seen as inflexible. Whilst a student must have achieved all the required skills for PP1 and PP2 in order to continue to the next part of the programme, it is possible to perform some of the skills for PP2 skills during PP1 if circumstances allow (or dictate). Nevertheless, the student and the Assessor must recognize that achieving a skill requires more than the act of doing; it involves the critical application of the relevant knowledge that is developed throughout the programme.

The generic nature of these skills implies that it ought to be possible for all student nurses to achieve them all by the end of the final year. In view of the limited time that the student nurse has got to complete these skills, it is suggested that the package should be reviewed on a weekly basis.

Any person, (other than the student) who writes in this skills book <u>must</u> enter a record of their signature into the Register of Signatories (see below).

Enhanced Practice Support Framework (EPSF)

The Enhanced Practice Support Framework (EPSF) is being used in several placement settings across Essex. The facilitation of learning is every registrant's responsibility. It is also important that registrants have a role model to support them with their decision making around assessment and the development of supervision and assessment skills. The Enhanced Practice Support Framework provides this support.

Practice Supervisors

. The practice supervisor coaches the student through *identified learning opportunities, guided participation and giving feedback*, with the aim to improve the student's performance in practice. Registered practitioners do not need a mentorship qualification to undertake this role.

On a daily basis, each pre-registration student will be assigned to work with one coach and negotiate a goal for the day that is linked to one of their competencies. The coaching relationship is relatively short term and may only span one shift or a few shifts on a placement.

The student should complete a log each day, which signs this to confirm accuracy of the student's entry.

For **Essex students** this will be documented on the progress sheets associated with specific skills in the student's practice assessment document.

The practice supervisor **will not** be responsible for the summative assessment of a student or for completing or signing any aspect of practice assessment.

Practice Assessors

A student will still be allocated to a practice assessor who will continue to work within the relevant NMC Standards.. Practice assessors will retain *overall responsibility for directing and assessing student learning*. They may also work as a practice supervisor with students for whom they are not the practice assessor. In order to fully assess a student's performance, the assessor is required to consult with the supervisors that the student has worked with, and request to see their student's completed progress sheets. This information and feedback provides the basis for assessment discussions between the assessor and their student, and informs their assessment decisions. Assessors will also be required to spend sufficient time working with their student to be able to make an informed judgement related to their level of competency.

Assessors retain *accountability and responsibility for the assessment* of a student and for completing and signing practice assessments.

To summarise:

Students complete their progress sheet (UoE).

Supervisors sign a student's progress sheets to confirm what the student has documented.

Assessors use these and other sources of information and feedback to complete and sign students' summative practice assessments.

Practice Learning Coordinator

The practice learning coordinator is an experienced educator in practice and will be responsible for helping *to lead and establish a quality learning environment* for students in their area. They will be responsible for ensuring students have been allocated to an assessor and a coach on a daily basis and for embedding the principles of the framework. The practice learning coordinator will also act as a support for assessors and supervisors, and a point of communication for Education Managers.

Enhanced Practice Support Framework FAQs

1. What do the students have to do?

The students will follow the usual process prior to placement – contacting the placement area, introducing themselves, and getting their shifts. When they start the placement, they will have an initial interview with their supervisor/assessor, where a learning contract is drawn up. student is allocated to a supervisor in advance of each shift,. At the beginning of each subsequent shift, the student will negotiate their goal for the day and document this in their progress sheet. Before the end of the shift the student will reflect on their learning, receive feedback from their supervisor and have their entry signed by the supervisor.

2. Who will assess the students in placement?

An assessorwill retain sole responsibility for signing the students' summative assessments, as in any other placement. The students will meet with their assessor regularly, as well as at the start, at mid-way point and at the end of the placement, so that the relevant documents can be completed..

3. Do students have to work through their practice competencies in order when setting a daily goal?

No. It is unlikely that students will address their practice competencies in order. This will be dependent on the opportunities for learning that are available on the shift. With their supervisor and assessor they will identify a goal for the day based on any one of the practice competencies. It is important that students learn to take responsibility for their learning.

5. Who can sign the student's progress sheet?

Any registered practitioner from any discipline, who has been allocated as a supervisor, can sign the log/progress sheet at the end of the shift.

6. What if a supervisor doesn't agree with the student's reflective account?

To avoid any disagreement, students should have a short discussion with their supervisor about how their performance related to their goal prior to documenting their reflection.

7. Who can complete a student's practice assessments?

Only the student's assessor can complete practice assessments.

Essex students have a single book: The formative/summative assessment pages should be completed by assessors; the progress sheets are completed by student and signed by supervisors.

8. If the student misses the opportunity to set a goal every day will they fail their placement?

No. The EPSF is not about passing or failing students. However, it is important that students engage with this aspect of practice learning. Students who have already done so have experienced particularly positive benefits.

9. Can an assessor negotiate a goal with their student?

Yes. When working with their student, assessors can apply the skill of coaching and therefore will negotiate a goal for the shift with their student.

10. Can a health care assistant (HCA) / health care support worker (HCSW) act as a supervisor?

No. The role of the coach is undertaken by a **registered professional only.** The supervisor may decide that their student should spend some time working with an HCA / HCSW as part of their learning experience to achieve their goal but feedback will come from the registered supervisor.

11. Who will be the point of contact for practice staff?

Please contact your Link Tutor if you have any queries about this framework.

HOW TO COMPLETE THE PROGRESS SHEET:

- 1. At the start of each shift, the student discusses with the supervisor which performance criterion would be suitable to address given the likely learning opportunities available on that shift.
- 2. In collaboration the student and supervisor design a goal to be achieved that relates directly to this performance criterion.
- 3. The student documents the goal in the progress sheet, and the student and supervisor work together to ensure opportunities to achieve the goal are optimised.
- 4. During the shift, the supervisor is likely to supplement opportunities for participation with skilled questioning that allows the student to explore their own knowledge base and enhance their understanding.
- 5. During or towards the end of the shift, the student reflects on their participation and performance on the shift, and records this in the progress. The supervisor signs the student's reflection as a realistic account of the student's progress.

SEE EXAMPLE BELOW

Example of completed progress sheet in University of Essex document Let's use an example. Look at page 129 of the University of Essex document. It outlines the performance criteria required of year 1 students in relation to Personal Care. The progress sheet for this is on the preceding page. One of the performance criteria is:

"The student nurse respects individual dignity when engaging in care delivery and uses communication and touch appropriately."

At the start of the shift: The student, in collaboration with the supervisor, sets a goal related to the performance criteria.

During or towards the end of the shift: The student reflects on how their performance on the shift has achieved the goal, and record this in the progress sheet as outlined below, and dates and signs the entry.

During or towards the end of the shift: The supervisor signs the student's reflection as

a realistic account of the student's progress in achieving the goal.

	Personal Care (PP1) – PROGRESS SHEET			
Date	Record of Reflective Learning	Signature		
ecember 2017	Record of Reflective Learning Goal: To demonstrate privacy, dignity and respect towards service users Reflection: I participated in the provision of personal hygiene needs and discussed preferences with the patient. I considered how the patient was feeling when being bed-bathed and took measures to maintain dignity e.g. drew curtains, ensured no part of the patient's body was exposed unless being washed, and talked and listened to the patient whilst delivering care, including them in decisions. A doctor entered whilst the patient was being bed-bathed which compromised dignity and respect. Next time I will	Emily Jones student) Murray (supervisor)

Guidelines for Mentors, supervisors and assessors

(For full details please see Placement Guidelines)

Guidelines for Scoring Skill Assessment

	Level	Meaning
4	Independent & excellent performance Safe: requires & seeks minimal prompts for thinking or action.	Demonstrates an excellent understanding of knowledge underpinning practice. Very coordinated, proficient and confident in technical clinical skills. Professional and caring at all times. Excellent effective communication skills with clients, carers and staff. Very good ability to synthesise theory and practice with minimal prompts. Very well developed clinical reasoning skills.
3	Infrequently assisted & good performance Safe: requires and seeks infrequent prompts for thinking or action.	Demonstrates a sound understanding of knowledge underpinning practice. Coordinated, proficient and confident in technical skills. Professional and caring at all times. Good effective interpersonal communication skills with clients, carers and staff. Good ability to synthesise theory and practice with infrequent prompts. Good clinical reasoning skills.
2	Assisted & satisfactory performance Safe: requires and seeks frequent prompts for thinking or action. The awarding of this score (or higher) denotes a PASS grade.	Demonstrates a satisfactory understanding of knowledge underpinning practice. Coordinated, proficient and confident in most technical skills. Professional and caring at all times. Appropriate interpersonal communication skills with clients, carers and staff. Satisfactory ability to synthesise theory and practice requiring prompts at times. Satisfactory clinical reasoning skills.
1	Dependent & unsatisfactory performance Unsafe: requires frequent verbal and physical prompts and direction. This awarding of this score denotes a FAIL grade, please refer to the further guidance given in the preceding pages of this document, the worked examples of a fail record and the 'Information for Mentorswhat to do if' regarding poor student performance.	Deficient in knowledge underpinning practice. Requires frequent prompting to elicit knowledge. Uncoordinated, unconfident and lacks proficiency in basic technical skills. Professional conduct and caring not consistently demonstrated. Frequently demonstrates ineffective interpersonal communication skills. Inability to synthesise theory and practice even with frequent prompting and support.

Adapted from Bondy, K.N. (1983) Journal of Nursing Education. 22(9); University of South Australia (1999) Bachelor of Nursing Clinical Assessment Form; Flinders Medical Centre Performance Review Graduate Nurse

Example of progress sheetMaintaining Safety — one sheet is included for each set of skills. To be completed during the placements by student and staff who work with the student.

Maintaini	Maintaining Safety (PP1) – PROGRESS SHEET				
Date	Experience & Comments	Signature			
01/02/17	Needs to think about assisting people to shower. Needs to consider correct positioning of shower chair before moving client.	Angelina Plume			
03/02/17	Practiced moving client using a hoist - helped to transfer clients from bed to chair. Always waited for help.	Dorothy Denton			
04/02/17	Too eager to move clients without assistance. More care must be taken to ensure own & client safety	Martha Cratched			
12/02/17	Had problems moving a chest in the clinical room. However asked for assistance and guided me through the procedure.	Sandra May			
14/04/17	Was able to describe signs of unconsciousness and the correct procedure for raising alarm. Could describe ABC and BLS protocols.	Charles Fairhead			
16/05/17	Helped in the cleaning of hoist and then used it to transfer patient to the bath. Helped to clean hoist again after use in preparation for next client.	Student Nurse Betty Sizemore			

Example of a pass record

12c. Planning (CP)

Aim: The newly qualifying nurse will competent in formulating realistic and measurable plans of care.

ESC: 2.8, 2.10, 2.11, 4.5, 9.14, 9.16, 16.3

The newly qualifying nurse will continue to demonstrate PP1/PP2 skills and:

- A. is able to plan and document a strategy for care that is realistic, measurable, and is based on a reflection of previous experience and published evidence; recognising, where possible, the importance of client choice.
- B. is able to negotiate an appropriate plan of care with the client(s), carer(s) and appropriate staff, which takes into account culture and beliefs, legal frameworks and professional ethics. This plan should recognize and promote the client's ability to self-care.
- C. identifies situations where client choice may compromise safety and act appropriately.
- D. appropriately manages situations where client's wishes conflict with planned care.

Classroom/Placement				
Date Ass Type Grade Assessor's Signature				
21/02/17	Formative	1	2 3 4	Charlie Dickens RMN

Comments

- Has continuously been involved in care planning for client group and has correctly identified client needs on number of occasions. Ensures that the client is involved in the planning and documents care plan satisfactorily.

	Classroom/Placement						
Date	Ass Type		Grade	Assessor's Signature			
23/04/17	Formative	1	2 3 4	Charles Fairhead RMN			

Comments

Student has demonstrated a continued ability to appropriately collaborate with clients and carers to establish care plans. The needs and views of the client and their carers are always included in the plan, and other staff are asked to contribute to the plan where appropriate. Recording is good with a clear indication of responsibility and timescales for various actions. Student is clearly aware of the importance of continually reviewing care plans to ensure currency and validity.

			Placement	
Date	Ass Type		Grade	Assessor's Signature
05/09/17	Summative	1	2 3 4	Angelina Plume RMN

Comments

Student ensured that planning is based upon appropriate assessment and appropriate negotiation of preferences with the client and their carers. Care plans were reviewed regularly and kept up to date and recorded in an in appropriate format. Wherever possible the student ensured that care plans were based upon the best available research and they regularly reviewed published databases in search of new evidence. Student always takes account of evaluation strategy during the planning process, which ensures that the plans are always measurable, and set in an appropriate timescale.

Example of a fail record

3a. Physiological Measurements (PP1)

Aim: The student nurse is able to accurately measure and record vital signs ESC; 5.2,5.4, 9.1-9.3, 9.6, 9.8-9.11, 10.5, 28.1, 28.4

Performance criteria: The student nurse:

- A. is able to carry out clinical screening of Body Mass Index and vital signs, (to include pulse, blood pressure, respirations, and temperature) and cleanses/disposes of equipment appropriately.
- B. is able to record findings in the appropriate documentation, recognising their significance.
- C. is able to recognize deviations from the norm, or the agreed action plan and reports these to relevant members of the healthcare team in a timely manner.
- D. is able to describe the potential impact that the environment or emotions have upon physiological measurements.
- E. is able to identify indicators of unhealthy lifestyles and their associated risks.

Classroom/Placement							
Date	Ass Type		Grade		Assessor's Signature		
21/02/17	Formative	1	2 3	4	Eríc Williams RMN		

Comments

Able to measure temperature, pulse and respirations and calculate BM1. Has difficulty in hearing blood pressures, but draws this to the attention of other staff and other members of the group. Accurately described the effects of anxiety on BP and pulse.

	Classroom /Placement							
Date	Ass Type		Gra <u>de</u>		Assessor's Signature			
01/05/17	Formative	1	② 3	4	Angelina Plume RMN			

Comments

Has adequately measured vital signs in a number of clients and has a clear understanding of the importance of client emotions on readings. Has made correct use of electronic BP monitor. Appears too hurried in recording measurements, making them difficult for other staff to read, necessity of accurate recording discussed. Able to discuss the potential impact of obesity on long-term health.

Placement						
Date	Ass Type		Grade			Assessor's Signature
01/07/17	Summative	1)	2	3	4	Charles Fairhead RMN

Comments

Able to measure temperature, pulse and blood pressure on a number of clients, but has not informed S/N when clients' temperature is high. Has not fully grasped how to record findings on the chart and has made 2 errors in recording BP. Student did describe in detail the potential impact of panic on pulse and respiration rates. However, accurate recording and reporting of unexpected readings are essential for safe practice.

5b. Medication Administration (PP2)

Aim: The student nurse will be a safe practitioner when administering medications to clients, and will have a working knowledge of the actions and side-effects of commonly used drugs.

ESC 2.5, 26.1, 34.1-34.3, 35.1, 35.2, 36.1, 37.1, 37.2, 38.1-38.4, 39.1, 39.2, 40.1-40.3, 41.1, 42.1

- A. in the classroom is able to achieve the required standard when performing medication calculations, demonstrating an accurate knowledge of conversion of units of measure (assessed in the University).
- B. in the practice setting, under supervision, able to safely calculate medicine dosages and perform drug administrations using oral, IM and SC routes, correctly recording the medications administered and omitted, including controlled drugs.
- C. is able to communicate with clients and carers, nursing staff, allied health professionals, and medical staff accurate information concerning medication.
- D. is able to demonstrate to the assessor the correct legal framework and local procedure for the ordering, storage and disposal of medication (including controlled drugs) in primary and/or secondary care settings.
- E. engage with clients in relation to pharmaceutical and non-pharmaceutical approaches to condition management.
- F. identify side effects and adverse reactions relating to common medicines and respond appropriately.
- G. demonstrate an understanding of different types of prescribing, including Patient Group Directions (PGD*), types of prescribing and methods of supply.

5c. Medication Administration (CP)

Aim: The newly qualifying nurse will be a safe and competent practitioner when administering medications to clients, and will have a working knowledge of the actions and side-effects of commonly used drugs.

ESC: 33.2, 34.2, 34.4-34.6, 35.3, 35.4, 36.2-36.6, 37.2, 38.4-38.6, 40.3-40.5, 41.2, 42.1-42.3

The newly qualifying nurse will continue to demonstrate PP1/PP2 skills and:

- A. in the classroom is able to achieve the required standard when performing drug calculations, demonstrating an accurate knowledge of conversion of units of measurement, using all routes of administration (assessed in the University).
- B. in placement setting safely manages drug administration, (including correct drug calculations) monitors effects of treatment and reports adverse effects.
- C. critically appraises available treatment options and uses evidence to determine when medicines are appropriate treatments.
- D. shows accurate knowledge of a range of medications (actions, calculation of doses, side-effects, interactions, etc.), their prescriptions, supply and administration in community and hospital settings
- E. is able to explain relevant information to clients and carers regarding their medications (actions, doses, side-effects, interactions, etc.) and assist them in making safe and informed choices.
- F. is able to recognize and safely manage anaphylaxis.
- G. assesses the client's ability to self-administer medications.
- H. works within national and local policies for medicines management, including controlled drugs.
- is able to demonstrate to the assessor the correct legal framework and local procedure for the ordering, storage and disposal of medication (including controlled drugs) in primary and/or secondary care settings.
- J. able, <u>through coursework and simulation</u>, to demonstrate knowledge, understanding and use of Patient Group Directions.
- K. is able to safely supervise others in all aspects of administration of medicines

THE PLACEMENT LEARNING CONTRACTS

Each Placement Learning Contract comprises:

- 1. Initial Learning Contract
- 2. Learning Contract Mid Placement Review
- 3. Learning Contract Completion Review
- 4. Assessment of Core Professional Values

At the end of the programme this <i>Development of Practical Skills Book</i> must contain:						
For Full-time BSc Nursing students	8 Placement Learning Contracts					
For MSc Nursing students	6 Placement Learning Contracts					
BSc Nursing Degree Apprenticeship students	4 'Home Placement' Placement Learning Contracts 3 'Visiting Placement' Placement Learning Contracts 1 'Final 12 Placement' Placement Learning Contracts

Risk of Placement Failure /Record of Additional Learning Needs

Please use a <u>copy</u> of this form to document any performance issues that may put the student at risk of failure and/or additional learning needs of the student. This should be completed through mutual discussion and agreement between the assessor and the student, and should involve the link-lecturer. It is the responsibility of all concerned to promote resolution of difficulties within the placement at the earliest opportunity. A copy of the completed form should be retained by the student and the <u>assessor</u> should send a copy to the link lecturer.

Student name		name P			
Description of Issue	Date	Plan of action	Review	Student	Assessor
	reported		Date	Signature	signature

A review date must be set prior to the end of the placement.

Resolved?	Remaining Issues/ Plan of action	Student Sign/Date	Assessor Sign/Date

If an issue remains unresolved following the review date please refer to the Placement Issue/ 'what to do if...' guidance given on pages 17-19 of this book. Additional copies of this form can be obtained from the link lecturer or placement administrator. Please contact the link lecturer, if you require further guidance.
