Curating PhD Students

Postgraduate Research milestones are used to ensure students are making sufficient progress during their studies, and to provide a supportive framework to guide students through the various stages of their research. The Milestones should also help to keep students on track to submit within the appropriate period. PGR supervisors should talk through the relevant milestones during supervisory meetings and they should be referred to on a regular basis.

Supervisory Panels and Research Students' Progress Boards will use the milestones to reflect on the level of progress being made, ahead of making a recommendation. Whilst the milestones are specific for each department and type of course, it is recognised that every research journey is different, and that whilst the milestones provide an overarching framework of expectations, a degree of flexibility should be given, based on the trajectory and scope of research.

Students and supervisors are encouraged to supplement these milestones with individual research plans which take into account the specifics of an individual research project and the individual circumstances of the PGR student.

Milestone	Requirement	Full Time term	Part Time term
M1.1	Assess training needs and knowledge required to undertake the combined theoretical and practical curatorial project (i.e. a major, research-driven curatorial output) and complete the accompanying research-based document. Complete the Training Needs Analysis to support this.	1	1-2
M1.2	<p>Choose a curatorial theme and demonstrate the wider significance/impact of the theme and curatorial approach with respect to contemporary discourses concerning the production, distribution, and reception of curatorial outputs. To demonstrate this, create a Curatorial Project Proposal, including (dependent on subject area):</p> <ul style="list-style-type: none"> ▪ Description of curatorial thesis and curatorial output contents (this should include a provisional working title, a detailed explanation of the general concept, and a list and brief discussion of proposed or potential artists/works). ▪ Identification of central curatorial problems/strategies to be addressed. ▪ Methodological considerations. ▪ Feasibility Report – identifying sources, access and ethical considerations ▪ Project plan, outlining objectives for each stage. <p>The Curatorial Project Proposal, including a preliminary curatorial plan of the curatorial output project (e.g. a project timeline identifying next steps, and assessing the available resources to do the project) will be presented at the first Supervisory Panel for full-time students only. If the relevant Panel requires it, these submissions can be reworked and resubmitted for the Confirmation Panel.</p>	1-2	
M1.3	<p>Demonstrate understanding of chosen curatorial topic/approach within the context of the field, in the following ways:</p> <ul style="list-style-type: none"> ▪ Critical Literature Review (where relevant). ▪ Critical review of selected curatorial topic/approach with regard to contemporary discourses of curatorial output practice. ▪ Together these Critical Reviews and the Project Proposal should comprise 10,000-15,000 words <p>To be presented at the first Supervisory Panel for full-time students only. Has the student and supervisory team considered whether the research will be using human participants, and if so, has sought and received formal university ethics approval.

Has the student and supervisory team considered whether the research uses security-sensitive material, and if so, has sought and received formal university registration of this material.

The Supervisory Panel will make a recommendation to the Research Students' Progress Board, ahead of the next academic year.
