Postgraduate research milestones ensure that students are making sufficient progress during their studies, to submit within the appropriate period, and to provide a supportive framework to guide students through the various stages of their research. PGR supervisors should talk through the relevant milestones during supervisory meetings and they should be referred to on a regular basis.

Supervisory panels and Research Students' Progress Boards use the milestones to guide judgements on progress and to shape a recommendation. It is recognised that every research journey is different and that, whilst the milestones provide an overarching framework of expectations, a degree of flexibility is also required based on the scope of research.

Students and supervisors are encouraged to supplement these milestones with individual research plans which take into account the specifics of an individual research project and the individual circumstances of the PGR student.

For students who have switched between FT and PT status, the following milestones will not directly apply and may require discussion with your supervisor, the PGR psychology administrator and the PGR Director. There is not perfect alignment between the FT and PT timelines, which are provided by the university.

Year 1 (Full time)
Year 1 and 2 (Part time)

Completion Period

If, at the 4th supervisory Panel, a student isn't on track to submit their thesis by the end of year 2 (year 4 for Part time students), a recommendation for a period of completion can be requested from the RSPB, for approval by the Faculty Dean (Postgraduate)
