<p>Were any visual aids used (e.g. PowerPoint presentations) clear and concise?</p>	<p>Yes – mainly.</p>	
<p>Were points from any visual aids verbally expanded on appropriately, without needing to read directly from the screen often? Did these key points allow the students to consider their own reflections?</p>	<p>Not really.</p>	<p>Might want to expand a bit more on certain topics as students seemed to get disengaged for those parts.</p>
<p>Were any visual aids used fully accessible to the entire student audience, with any individual learning differences considered?</p>	<p>Not sure.</p>
